Our Domain [www.blockout.net](http://www.blockout.net) was kindly donated from Nerius Landys, a passionate blockout fan. Nerius owned the domain for 7 years and transferred it for free to this project. Nerius is an ambitious blockout fan, who also created a blockout clone back in 2000. sadly he had other priorities and could not finish the multiplayer part. Nonetheless, his Java implementation of blockout is to date the best blockout clone i am aware of.

take a look:
