Blockout II version 2.4 released !

Contributed by Andre
Thursday, 10 January 2008

A new version of Blockout II was released by Jean Luc Pons. This new version adds the "Practice Mode" that allows you to train without time pressure and the "Demo Mode" that allows you to watch a computer AI that plays blockout. Also, several bugs were fixed: (replay bug, random generator (FLAT block set), fullscreen bug (Linux)).
